
Theme of the month: The Kidneys

THE IMPORTANCE OF FILTERS

The **kidneys** are a pair of bean-shaped organs located at the base of the chest, on the sides of the spine. They carry out some fundamental functions: they filter harmful substances out of the blood; they regulate the hydro-saline and acid-base balance in the blood; they produce hormones that control blood pressure and the production of red blood cells; they facilitate the activation of vitamin D so that the organism can use it efficiently.

Kidney diseases are often asymptomatic. This means that when they show up, they are already at a quite advanced stage. It is important to periodically have urine, blood and pressure checked.

In the month of the WORLD KIDNEY DAY, check up the health of your kidneys at CDC

No appointment needed, no GP referral, just show up at the clinic, on an empty stomach, any day from 7:30 to 9:30 am

Full Urinalysis (first-morning urine)
Complete blood count, Blood sugar level
Sodium, Potassium
Uric acid level
Urine Albumin and Albumin/Creatinine ratio +
GFR
Blood pressure check

PRICE FOR THE
MONTH OF MARCH

€ 18

If the results are outside the acceptable range, consult your GP
