

# General Check-up

The hectic pace of life and the ever-changing demands of the external environment place the body under constant stress. This is why it is useful to carry out regular General Check-Ups to monitor the state of your health and identify any problems at an early stage.

To this end, CDC|Gruppo Affidea proposes the monitoring of a series of broad spectrum parameters that can provide useful information on the state of your health.

## Take the General Check-Up CDC|Gruppo Affidea

With no letter from your doctor.
