

The Thyroid

The thyroid is a little butterfly-shaped gland located at the front of the neck which regulates important bodily functions.

Problems can be caused by an underactive thyroid (hypothyroidism) or an overactive thyroid (hyperthyroidism).

The most common symptoms of hypothyroidism are fatigue, dry skin, intolerance of cold and weight gain. Symptoms of hyperthyroidism are fatigue, increased heart rate (tachycardia), intolerance of heat, sweating, weight loss with increased appetite and insomnia.

Check your thyroid with the CDC|Gruppo Affidea Check-up

With no letter from your doctor.

- **TSH**
- **FT3**
- **FT4**

PRICE FOR
THE MONTH OF
MARCH

€ 27

Code CDC135

If the results are outside the acceptable range, contact your GP
